Attn: Mr. John Clarka,
Supervisor of Construction

Dear Sir:

This Agency has reviewed your present practice of stockpiling by-products from your manufacturing procedures on-site. Current stockpiling techniques shall be exempt from EP-20-09(K)(1) under EP-20-03(2) as long as the following conditions exist:

- 1) There is a likelihood of recovering materials from these by-products, and
- 2) The temporary storage of these materials shall include complete containment so that no nuisances, including but not limited to, odor, fugitive dust, toxic fumes or gases will occur; or pollution of ground or surface waters shall result.

Determination that these conditions have not been met, shall be in the judgement of the Health Commissioner or the Director or his authorized representative.

If you have any further questions regarding this matter, please call this writer at (216) 425-9171).

Sincerely yours,

Lynn A. Clark
District Engineer
